Jan 2023 – Present

SurryHQ
Surry Hills, NSW

- Developed responsive user interfaces using React, HTML5 and CSS3
- Managing existing UI on surryhq.com and built web apps from design for SurryHQ clients
- Worked closely with developers to produce well-documented, reliable and maintainable code
- Collaborated with project managers and development team to brainstorm new ideas
- Assisted with tutoring programming students

Projects

Portfolio Site

Personal Web

🐙 [Repository](#)

🔗 [Website](#)

Personal website which is built in React.js using hooks, divided in components which give the project a proper organization and an easy maintenance. For styling, it used Tailwind CSS and was deployed on Vercel.

Petra

E-Commerce

🐙 [Repository](#)

🔗 [Website](#)

Petra is an E-Commerce built in React.js that brings information from a Rest API and is divided into component each component handles the information using React Hooks and Redux is used to share information between components. For styling, it used Bootstrap and CSS and was deployed on Vercel.

To Buy List

Web-Application

🐙 [Repository](#)

🔗 [Website](#)

This application is built with Vanilla JavaScript, HTML and Vanilla CSS. It is a To-Do list app that permits making a list of different items that the customer would like to buy and it is also possible to choose an icon and description as well as a category for each product in the list. Once the item is created it is possible to see it in more detail.
